Ultra high-definition 8x2 system switcher, scaler, mic mixer, audio DSP, amplifier, and control system

Built-in .AV Framework™ delivers a fully-functional system without any programming[2]

Integrated 3-Series Control System® allows fully-programmable room control

Onboard AirMedia® gateway enables wireless BYOD presentation capability[1]

Built-in H.264 streaming video decoder[3]

Provides matrix signal routing for up to 8 video sources and 2 displays

Handles video resolutions up to 4K DCI and Ultra HD

Includes HDMI®, DM 8G+, and balanced stereo analog audio inputs

Also supports Dual-Mode DisplayPort, DVI, and HDBaseT® sources[4]

QuickSwitch HD™ technology manages HDCP keys for fast, reliable switching

Auto-Locking® technology achieves rapid switching between disparate sources

Performs automatic AV signal format management via EDID

HDCP 2.2 compliant

Provides adjustable input level compensation on each audio input

Includes built-in 6-channel gated microphone mixing with DSP

Provides one HDMI output and one DM 8G+ (HDBaseT compatible) output

DigitalMedia 8G+-™ connectivity enables long-distance wiring over CAT type twisted pair cable[7]

HDBaseT Certified — Enables direct connection to other HDBaseT certified equipment

Features a high-performance 4K scaler on the HDMI output

Upscales input signals to match the native resolution of any screen — including 4K and Ultra HD displays!

Downscales 4K, UHD, and ultra high-resolution computer signals to fit 1080p and other lower-resolution displays

Handles any input resolution from standard NTSC 480i or PAL 576i, to UHD and 4K

Provides intelligent frame rate conversion, content-adaptive noise reduction, and motion-adaptive de-interlacing

Provides 3D to 2D signal conversion[5]

Provides three balanced stereo audio outputs, each with independent mixer and DSP

Provides two additional audio mixes, either of which is selectable at either digital output

Features a built-in amplifier, selectable for 25W/Ch. @ 8Ω stereo or 50W @ 70/100 Volts mono

 Enables analog-to-HDMI audio embedding and de-embedding

 Enables USB signal routing via DM® transmitters and receivers or USB-EXT-DM series extenders[9]

Includes onboard IR, RS-232, relay, digital input, and Cresnet® control ports

Supports Crestron® touch screens, keypads, and wireless remotes

Supports XPanel with Smart Graphics® computer and web based control

Supports iPhone®, iPad®, and Android™ control apps

Supports universal remotes via external RC-5 compatible IR receiver[6]

Communicates natively with Crestron Fusion®

Enables IT-friendly network integration via SNMP

Integrated Ethernet switch provides a single-point LAN connection

Control Subnet — provides a dedicated local network for Crestron devices

Private Network Mode — requires just one IP address for the complete system

Content LAN port allows streaming and AirMedia traffic to be isolated on a secondary network

Includes front panel controls for basic configuration, diagnostics, and signal routing

Includes customizable front panel label strips and LCD display

Allows advanced setup and adjustment via a web browser

Features an internal universal power supply for worldwide compatibility

Furnishes power to PoDM+ and HDBaseT PoE+ powered devices[8]

3-space 19-inch rack-mountable
The DMPS3-4K-250-C from Crestron® offers an all-in-one 4K AV presentation system for classrooms, boardrooms, lecture halls, and videoconference rooms. Delivering a complete, custom-programmable room solution with fully-configurable signal routing and processing is easy and cost-effective using the DMPS3-4K-250-C. In one 3-space rack mount package, it integrates the control system, matrix switcher, video scaler, streaming decoder, mic mixer, audio DSP, and amplifier. Its built-in AirMedia® gateway, when activated, enables wireless presentation from computers and mobile devices.[1] DigitalMedia 8G+® and HDBaseT® connectivity affords a streamlined, long-distance wiring solution for remote sources and display devices, and for facility-wide integration as part of a larger media distribution system.

4K Ultra HD
Crestron DigitalMedia™ continues to advance the standard for digital AV signal management, delivering the most complete end-to-end 4K system solutions available. The DMPS3-4K-250-C handles 4K/60 video with HDCP 2.2 encryption, ensuring support for all the latest 4K and Ultra HD displays and media sources. Support for 4K is also essential to support the latest generation of computers and monitors with native resolutions beyond 1080p and WUXGA.

No Programming Required!
Installing the DMPS3-4K-250-C is easy, fast, and affordable. Built-in .AV Framework™ technology delivers a fully-functional presentation system with simplified configuration and a choice of control options and other add-ons. For complete details on the capabilities supported by .AV Framework, please visit: www.crestron.com/avframework.[2]

AirMedia® Wireless Presentation [1]
Built-in AirMedia technology allows for wireless presentation of content from a laptop, smartphone, or tablet device via a Wi-Fi® wireless network. With AirMedia, anyone can walk into the room with a Windows® or MacBook® laptop and connect without wires, enabling the presentation of any content including video at frame rates up to 15 fps. iPhone®, iPad®, and Android™ devices can present PowerPoint®, Excel®, Word, PDF, and JPEG documents, or use “Shot&Show” to share any content as a static screenshot. Video and other content can be presented from an Apple® iOS® mobile device or Mac® OS X® computer using device mirroring. AirMedia lets up to 32 participants connect at once, switching from one to the next for seamless collaboration on the fly.[1]

HD Streaming Video
Its onboard streaming decoder enables to DMPS3-4K-250-C to receive a high-definition AV signal over the network or internet from a DigitalMedia switcher, IP camera, or streaming encoder (Crestron DM-TXRX-100-STR or similar). H.264 and MJPEG streaming formats are supported with resolutions up to HD 1080p and bitrates up to 25 Mbps. High-quality AAC audio decoding is employed to handle 2-channel stereo audio with full frequency response.[3]

4K System Switcher
The DMPS3-4K-250-C provides high-performance routing of HDMI®, AirMedia, and streaming AV sources to two separate displays, projectors, codecs, and other devices. Its video inputs include six HDMI, one DM 8G+, and one streaming/AirMedia. The HDMI inputs are compatible with DVI and Dual-Mode DisplayPort sources[4], and the DM 8G+ input is compatible with HDBaseT. Five balanced analog audio inputs are also included. Each HDMI and analog audio input includes adjustable input compensation to accommodate a range of signals and maintain consistent volume levels when switching between sources.

Built-in 8x2 video matrix switching allows two different video sources to be routed simultaneously to two different display devices. Video outputs are comprised of one HDMI and one DM 8G+. The HDMI output is compatible with DVI[4] and the DM 8G+ output is compatible with HDBaseT.

The audio signal from any input can be freely routed to any of three separate stereo analog audio outputs. Audio can also be routed to the digital outputs via two independently switchable signal paths, either of which may be selected to feed the HDMI output, the DM 8G+ output, or both.

4K/60 Video Scaling
A high-performance 4K scaler is included on the HDMI output to ensure an optimal image on the display no matter what source is selected. The scaler allows all types of video and computer sources to be viewed reliably and look their best on any display up to 4K.
Input resolutions from standard definition NTSC 480i to ultra-high-definition 4K DCI are scaled beautifully to any output resolution up to 4K DCI (4096 x 2160 @ 60 Hz). Interlaced sources are converted to progressive scan using motion-adaptive deinterlacing. Intelligent frame rate conversion enables support for 24p and PAL format sources. And, 3D to 2D conversion allows 3D content to be viewed on a 2D-only display. Fully automatic operation eliminates any complicated setup by utilizing the display’s EDID to configure the scaler.

Scaling can be added to the DM 8G+ output using the DM-RMC-4K-SCALER-C receiver[6], which features its own built-in 4K scaler. This method of employing an independent scaler for each display device delivers the most versatile and reliable solution for handling a wide array of input sources and routing them to two disparate display devices.

**DigitalMedia 8G+®**

Its DM 8G+ input and output endow the DMPS3-4K-250-C with incredible potential for connecting remote sources and display devices, and integrating with larger systems. DM 8G+ provides a true one-wire interface for transporting ultra high-definition video, audio, control, power, and networking signals over CAT type cable at distances up to 330 feet (100 meters). Connecting a DM 8G+ receiver to the DM 8G+ output provides a streamlined AV and control interface for a projector or flat panel display located anywhere in the room. Connecting a DM 8G+ transmitter provides expanded input connectivity to incorporate remote AV sources and mobile devices at a conference table, lectern, credenza, wall plate, or some other location. DM 8G+ can also provide the interface to a centralized DigitalMedia matrix switcher to enable the distribution of signals between multiple rooms and buildings.[7,8]

**HDBaseT® Certified**

Crestron DM 8G+ technology is designed using HDBaseT Alliance specifications, ensuring interoperability with other HDBaseT certified products. Via DM 8G+, the DMPS3-4K-250-C can be connected directly to an HDBaseT compliant source or display device without requiring a DM transmitter or receiver.

**6-Channel Microphone Mixer**

The DMPS3-4K-250-C includes built-in mixing and processing for six microphones. Each mic input provides 60 dB of gain adjustment, switchable 48V phantom power, fully-adjustable gating, compression, delay, and 4-band semi-parametric EQ. Sophisticated matrix mixing allows for a completely different stereo mix of all six microphones at each of the DMPS3-4K-250-C’s three analog audio outputs. Two additional mixes can be configured and selected to feed the HDMI and DM 8G+ outputs.

**Professional Audio DSP**

Each analog audio output on the DMPS3-4K-250-C includes its own digital signal processor, allowing each output to be optimized to feed a power amplifier, codec, recorder, or assistive listening system. In addition to real-time adjustable volume, bass, treble, and mute controls, each DSP provides 10-band graphic equalization, 4-band parametric equalization, fully-adjustable limiting, and up to 85 ms of speaker delay adjustment.

**Built-in Power Amplifier**

Its built-in power amplifier allows the DMPS3-4K-250-C to directly drive a pair of stereo speakers (25 Watts per channel @ 8Ω), or a group of distributed ceiling speakers (50 Watts mono @ 70 or 100 Volts). Fed by the main “Program” output, the internal amplifier benefits fully from the onboard DSP. For larger applications, Crestron AMP-Series power amplifiers may be added to provide a complete solution for driving separate program and speech speakers, or any multi-zone speaker system.

**Audio Embedding & De-Embedding**

The inclusion of professionally balanced analog audio inputs and outputs, combined with the ability to route audio signals independent of video, affords extensive flexibility for many specialized applications — without the need for any extra equipment! For instance, its balanced inputs allow the DMPS3-4K-250-C to interface directly with an audio mixing console, allowing the live sound mix to be embedded with the video signal from a digital camera and combined into a single HDMI output signal. Or, any of its balanced outputs may be used to de-embed audio from a digital AV source to feed the mixing console. An “Aux” output may even be re-routed back through an analog input to allow its built-in DSP, or an external DSP, to be used to process the audio signal feeding the HDMI and DM 8G+ outputs.

**EDID Format Management**

The DMPS3-4K-250-C allows for management of the EDID (Extended Display Identification Data) information that passes between the display devices, scaler, and input sources in the system. From the web browser setup screen, the format and resolution capabilities of each device can be assessed, allowing the installer to configure EDID signals appropriately for the most desirable and predictable behavior.

**QuickSwitch HD™ Technology**

Handling digital media signals means handling HDCP (High-bandwidth Digital Content Protection), the encryption scheme used by content providers to protect their DVDs, Blu-ray discs, and broadcast signals against unauthorized copying. Viewing HDCP encrypted content requires a source device to “authenticate” each display and signal processor in the system and issue it a “key” before delivering an output signal. Crestron QuickSwitch HD manages these keys to ensure fast, reliable switching and immunity to “blackouts” for every source and display device connected to the system.

**Auto-Locking® Technology**

Crestron Auto-Locking Technology enables super-fast signal switching by instantaneously configuring every device in the signal path, including DM transmitters, DM receivers, and scalers, as soon as the signal hits the first device. Whether switching between sources or changing TV channels, Auto-Locking significantly reduces the time it takes each device to sense the new signal and configure itself to handle the changes, virtually eliminating any noticeable gap while switching.

**USB Signal Routing**

Along with video and audio, the DMPS3-4K-250-C can also provide for the routing of USB HID (Human Interface Device) signals, allowing a USB HID compliant keyboard and/or mouse at one location to control a computer or media server at another location. USB HID connectivity is provided through select DM receivers and transmitters. Crestron also offers USB over
Ethernet Extenders (USB-EXT-DM-LOCAL and USB-EXT-DM-REMOTE), which may be used to enable the routing of multiple USB devices of virtually any type, all seamlessly managed through the DMPS3-4K-250-C.\[6\]

**Integrated 3-Series Control System\[5\]**

Its built-in 3-Series control system enables the DMPS3-4K-250-C to provide complete, customizable control of every AV device, as well as room lighting, window shades, and projection screens, without requiring a separate control processor. Onboard control ports include four IR ports, two RS-232 COM ports, four relay ports, and four digital input ports, as well as Cresnet\[6\] and Ethernet. The DMPS3-4K-250-C supports the full line of Crestron touch screens, keypads, and wireless remotes for a user experience custom tailored to the specific requirements of each end-user. Support for Crestron control apps and Crestron Fusion\[5\] delivers the industry's most powerful platform for remotely controlling, monitoring, and managing multiple rooms using computers and mobile devices.

**CEC Embedded Device Control**

For controlling third-party AV devices, the DMPS3-4K-250-C provides an alternative to conventional IR, RS-232, and Ethernet by harnessing the CEC (Consumer Electronics Control) signal embedded in HDMI. Using CEC, many devices can be controlled right through their HDMI or HDBaseT connections, eliminating the need for any dedicated serial cables or IR emitters.

**Built-in Ethernet Switch**

In addition to transporting digital video and audio, the DM 8G+ ports on the DMPS3-4K-250-C can also extend Ethernet out to the display and source devices (via select DM transmitters and receivers), providing high-speed connectivity for each room device that requires a LAN connection. Ethernet is also utilized internally by the Crestron control bus to manage each transmitter and receiver and provide device control.

**Dedicated Control Subnet**

The Crestron Control Subnet is a Gigabit Ethernet network dedicated to Crestron devices. Via the DMPS3-4K-250-C's Control Subnet port, an installer may simply connect a single touch screen or wireless gateway, or add a Crestron PoE switch (CEN-SW-POE-5 or CEN-SWPOE-16)\[9\] to handle multiple touch screens, gateways, and other devices. PoE can be enabled at the Control Subnet port to power a single touch screen or other PoE powered device.\[9\] Auto-configuration of the entire subnet is performed by the DMPS3-4K-250-C, discovering each device and assigning IP addresses without any extra effort from the installer.

**Private Network Mode**

To streamline its implementation on a corporate or university LAN, the DMPS3-4K-250-C employs Private Network Mode. Using Private Network Mode, the DMPS3-4K-250-C requires just one IP address for the complete room system including all connected DM receivers and transmitters.

**Easy Setup**

Every step of the DMPS3-4K-250-C setup process is designed to be quick and easy. Out of the box, the front panel supports basic signal routing for easy testing and troubleshooting during installation. Simplified system configuration is enabled using AV Framework, which is easily configurable via a computer web browser.\[8\] Advanced configuration and adjustment is enabled through the front panel or a web browser. The front panel label strips can be customized using Crestron Engraver software or standard 3/8” tape labels, allowing for the clear designation of each input and output. Inputs and outputs may also be designated by name to appear on the LCD display when selected.

**Crestron Connect It\[4\]**

Crestron Connect It is a cost-effective, simple-to-use presentation solution that works seamlessly with the DMPS3-4K-250-C. Simply add one or more Crestron Connect It Cable Caddies (TT-100, TT-101, TT-110, or TT-111 series), to provide BYOD connectivity and one-touch control for multiple participants around a conference table. Power and communications for each cable caddy are provided via Cresnet, or via the USB port on a Crestron Connect It compatible DM transmitter.

**SPECIFICATIONS**

**Operating System**

Crestron 3-Series; real-time, preemptive, multi-threaded/multitasking kernel; Transaction-Safe Extended FAT file system; supports up to 10 simultaneously running programs; preloaded DMPS3. AV Framework Base Program

**Memory**

SDRAM: 512 MB
Flash: 4 GB

**Communications**

Ethernet: 10/100/1000 Mbps, auto-switching, auto-negotiating, auto-discovery, full/half duplex, industry-standard TCP/IP stack, UDP/IP, CIP, DHCP, SSL, TLS, SSH, SFTP (SSH File Transfer Protocol), FIPS 140-2 compliant encryption, IEEE 802.1X, SNMP, BACnet MS/IP, IPv4 or IPv6, Active Directory authentication, IIS v.6.0 Web Server, SMTP e-mail client, RSTP, Private Network Mode
Control Subnet: 10/100/1000 Mbps Ethernet, auto-switching, auto-negotiating, auto-discovery, full/half duplex, DHCP server, DNS Server, port forwarding, Isolation Mode, IEEE 802.3at Type 1 compliant PoE+ PSE
AirMedia\[10\]: (Via Ethernet) 10/100 Mbps, IPv4, DHCP, TLS, AES, mDNS, HTTPS web server
Streaming: (Via Ethernet) 10/100 Mbps, DHCP, H.264 decoding, MJPEG decoding, HDCP 2.2, RTP, RTSP, SDP
Cresnet: Cresnet master mode
USB: USB signal routing via select DM transmitters and receivers, or via USB-EXT-DM series extenders; USB device port for computer console (setup)
RS-232: 2-way device control and monitoring up to 115.2k baud with hardware and software handshaking
IR/Serial: 1-way device control via infrared up to 1.2 MHz or serial TTL/RS-232 (0-5 Volts) up to 115.2k baud; supports CNXRMIRD IR Receiver\[8\]
DigitalMedia: DM 8G+, HDCP 2.2, EDID, CEC, PoDM+, Ethernet
HDBaseT: HDCP 2.2, EDID, CEC, RS-232, PoE+, Ethernet
HDMI\[8\]: HDCP 2.2, EDID, CEC

**NOTE:** Supports management of HDCP and EDID; supports management of USB signal routing via select DM transmitters and receivers.
of CEC between the connected HDMI and HDBaseT devices and the control system

Video

Switcher: 8x2 matrix, Crestron QuickSwitch HD technology
Scaler (HDMI output): (1) 4K video scaler with motion-adaptive deinterlacing, intelligent frame rate conversion, Deep Color support, 3D to 2D conversion, content-adaptive noise reduction, and widescreen format selection (zoom, stretch, maintain aspect-ratio, or 1:1)
Input Signal Types: HDMI w/Deep Color, 3D [4], & 4K (DVI & Dual-Mode DisplayPort compatible [5]) on Inputs 1-6; DM 8G+ & HDBaseT w/Deep Color, 3D [4], & 4K on Input 7; streaming & AirMedia on Input 8 (LAN)
Output Signal Types: HDMI w/Deep Color & 4K (DVI compatible [4]) on Output 1; DM 8G+ & HDBaseT w/Deep Color, 3D, & 4K on Output 2

Maximum Resolutions:

Streaming Decoder

Video Formats: H.264 (MPEG-4 part 10 AVC), MJPEG
Audio Format: AAC stereo
Bitrates: Up to 25 Mbps
Resolutions: Up to 1080p60

AirMedia [1]

Users: Supports up to 32 users (presentation device connections)
Client Software OS Support: Windows XP, Windows Vista™, Windows 7, Windows 8, Window 10, Mac OS X (versions 10.5 thru 10.11)
Client Software Video Frame Rate: 15 fps (typical), audio supported
Mobile App OS Support: Apple iOS, Android
Mobile App File Supported: MS PowerPoint (.ppt, .pptx), MS Word (.doc, .docx), MS Excel (.xls, .xlsx), PDF (.pdf), JPEG (.jpg, .jpeg)
Mobile App Shot&Show: Shares a static screen shot
Device Mirroring: Shares the screen image and audio from an Apple iOS or Mac OS X device
Resolutions: 800x600@60Hz, 1024x768@60Hz, 1280x720@60Hz (72p60), 1280x768@60Hz, 1280x800@60Hz, 1280x1024@60Hz, 1360x768@60Hz, 1400x1050@60Hz, 1440x900@60Hz, 1600x1200@60Hz, 1920x1080@60Hz (1080p60), 1920x1200@60Hz
Audio Format: Stereo

Audio – General

Switcher/Mixer: 13x5 stereo source matrix switcher, digital & analog source inputs, streaming & AirMedia source input, 6-channel gated mic mixer w/DSP, independent mixer per analog output (6-ch mic + 1 stereo source), independent stereo DSP per analog output, integrated power amplifier, two independent digital output mixers (6-ch mic + 1 stereo source), 2x1 digital output mix selector per digital output
Analog-To-Digital Conversion: 24-bit 48 kHz
Digital-To-Analog Conversion: 24-bit 48 kHz
Frequency Response, Digital & Analog Line Outputs:
20 Hz to 20 kHz ±0.5 dB (digital source);
20 Hz to 20 kHz ±0.5 dB (analog line source);
20 Hz to 20 kHz ±0.7 dB (microphone source)
S/N Ratio, Digital & Analog Line Outputs:
>108 dB, 1 kHz, A-weighted (digital source);
>103 dB, 1 kHz, A-weighted (analog line source)
S/N Ratio, Speaker Output:
96 dB @ 25 Watts into 8 Ohms, 1 kHz, A-weighted;
96 dB @ 25 Watts into 4 Ohms, 1 kHz, A-weighted
THD+N, Digital & Analog Line Outputs:
<0.002%, 20 Hz to 20 kHz (digital source);
<0.005%, 20 Hz to 20 kHz (analog line source);
<0.05%, 20 Hz to 20 kHz (microphone source)
THD+N, Speaker Output:
<0.1%, 1 kHz @ 25 Watts into 4 or 8 Ohms;
<0.7%, 20 Hz to 20 kHz @ 25 Watts into 4 or 8 Ohms
Stereo Separation, Digital & Analog Line Outputs:
>108 dB (digital source);
>103 dB (analog source)
Stereo Separation, Speaker Output:
>65 dB @ 25 Watts, 1 kHz
Channel Separation, Digital Outputs:
>108 dB (digital source);
>103 dB (analog source)
Channel Separation, Analog Line Outputs:
>103 dB
Speaker Output Modes: 4Ω/8Ω stereo, 70V mono, or 100V mono
Speaker Amplifier Output Power:
25 Watts RMS per channel @ 8 Ohms, 4 Ohms tolerant
50 Watts RMS @ 70 or 100 Volts

Audio – Microphone Inputs

Typical of 6 microphone input channels (Mic/Line 1 – 6):
Input Signal Types: Mono analog mic or line level
Phantom Power: Enable/Disable per channel
Gain: 0 to +60 dB Gain adjustment in 3dB increments, plus Mute
Delay: 0.0 to 85.0 ms
EQ Center Frequencies: 50 to 200 Hz (Band 1), 200 to 800 Hz (Band 2), 800 to 3.2kHz (Band 3), 3.2kHz to 12.8kHz (Band 4)  
EQ Gain: ±12.0 dB per band  
High-Pass Filter: On or Off  
Gating Threshold: -80 to 0 dB  
Gating Depth (Attenuation): -80 to 0 dB  
Gating Attack: 1 to 250 ms  
Gating Release: 1 to 1000 ms  
Compression Threshold: -80 to 0 dB  
Compression Ratio: 1:1 to 10:1  
Compression Attack: 1 to 250 ms  
Compression Release: 1 to 1000 ms  
Compression Curve: Hard or soft knee

Audio – Source Inputs

Input Signal Types: HDMI (Dual-Mode DisplayPort compatible) on Inputs 1-6, DM 8G+ & HDBaseT on Input 7, streaming & AirMedia on Input 8 (LAN), analog 2-channel on Aud In 1-5  
Analog Formats: Stereo 2-channel  
Digital Formats: 2-channel LPCM  
Input Compensation: ±10.0 dB, adjustable per input

Audio – Analog Line & Speaker Outputs

Typical of 1 analog line/speaker output (Program Out & Speaker Output) and 2 analog line outputs (Aux Out 1 – 2):  
Output Signal Type/Format: Stereo 2-channel  
Mic 1 – 6: -80 to +10 dB Level adjustment range, plus Mute and Pan  
Mics Master: -80 to +10 dB Level adjustment range, plus Mute  
Source: -80 to +10 dB Level adjustment range, plus Mute and Balance  
Master Volume: -80 to +10 dB Level adjustment range, plus Mute and Mono  
Mixer Presets: 1 through 5  
Bass: ±12.0 dB  
Treble: ±12.0 dB  
Equalization: 10-band graphic + 4-band parametric  
GEQ Center Frequencies: 31.5, 63, 125, 250, 500, 1k, 2k, 4k, 8k, 16k Hz  
GEQ Gain: ±12.0 dB per band  
PEQ Center Frequencies: 10 to 22kHz Hz per band  
PEQ Gain: -36.0 to +24.0 dB per band  
PEQ Bandwidth: 0.02 to 3.5 octaves per band  
PEQ Types: Peaking EQ, High Pass, Low Pass, High Shelf, Low Shelf, Notch Delay: 0.0 to 85.0 ms  
Limiter Threshold: -80 to 0 dB  
Limiter Ratio: 1:1 to 10:1  
Limiter Attack: 1 to 250 ms  
Limiter Hold: 1 to 200 ms  
Limiter Release: 1 to 1000 ms  
Limiter Curve: Hard or soft knee  
EQ Presets: 1 through 10 (includes Delay and Limiter settings)

Audio – Digital Outputs

Typical of 2 digital outputs (HDMI Output 1 & DM Output 2):  
Output Signal Types: HDMI (DVI compatible) on Output 1, DM 8G+ & HDBaseT on Output 2  
Formats: 2-channel LPCM  
Digital Output Mix Select 1 – 2: Selects which mix is routed to the corresponding output  
Typical of 2 digital output mixers:  
Mic 1 – 6: -80 to +10 dB Level adjustment range, plus Mute and Pan  
Mics Master: -80 to +10 dB Level adjustment range, plus Mute  
Source: -80 to +10 dB Level adjustment range, plus Mute and Balance  
Master Volume: -80 to +10 dB Level adjustment range, plus Mute  
Mixer Presets: 1 through 5

Connectors – Audio/Video Inputs

Aud In 1 – 5: (5) 7-3.5 mm detachable terminal blocks;  
Balanced/unbalanced stereo line-level analog audio inputs;  
Input Impedance: 24k Ohms balanced/unbalanced;  
Maximum Input Level: 4 Vrms balanced, 2 Vrms unbalanced  
MC1/LN1 – MC6/LN6: (6) 7-3.5 mm detachable terminal blocks;  
Comprises (6) balanced microphone/line audio inputs;  
Balanced Mic Input Level: -60 to 0 dBV, 1 Vrms maximum;  
Balanced Line Input Level: -31 to +11 dBV, 3.7 Vrms maximum;  
Unbalanced Line Input Level: -37 to +5 dBV, 1.85 Vrms maximum;  
Mic Input Impedance: 3.9k Ohms balanced;  
Line Input Impedance: 19k Ohms balanced, 9.5k Ohms unbalanced;  
Phantom Power: 48 Volts DC, software enabled/disabled per channel  
HDMI 1 – 6 INPUTS: (6) HDMI Type A connectors, female;  
Digital video/audio inputs;  
(DVI and Dual-Mode DisplayPort compatible)

DM INPUT 7: (1) 8-pin RJ45 connector, female, shielded;  
DM 8G+ input, HDBaseT compliant;  
PoDM+ PSE port (HDBaseT PoE+ compatible);  
Connects to the DM 8G+ output of a DM transmitter or other DM device, or to an HDBaseT device, via CAT5e, Crestron DM-CBL-8G, or Crestron DM-CBL-ULTRA cable

Connectors – Audio/Video Outputs

SPEAKER OUTPUT 4Ω/8Ω L – R: (2) 2-pin 7.62 mm 15A detachable terminal blocks;  
4-8 Ohm stereo speaker-level audio output;  
Wire Size: Terminals accept up to 14 AWG (2.5 mm²);  
Output Power: 25 Watts RMS per channel stereo at 8 Ohms, 4 Ohms tolerant  
SPEAKER OUTPUT 70/100V: (1) 2-pin 7.62 mm 15A detachable terminal block;  
Transformer-isolated 70 or 100 Volt mono speaker-level audio output;  
Wire Size: Terminals accept up to 14 AWG (2.5 mm²);  
Output Power: 50 Watts RMS mono at 70 or 100 Volts;  
Note: 4Ω/8Ω and 70/100V outputs are mutually exclusive
**DMPS3-4K-250-C** 3-Series® 4K DigitalMedia™ Presentation System 250

**SERVICE:** Enables PoE power sourcing on the CONTROL SUBNET port
Enables PoDM+ power sourcing on each DM INPUT/OUTPUT port; 48 Volt DC power input for PoDM power supply

**IR Receiver**

For connection of the IR IN:
1-way serial TTL/RS-232 (0-5 Volts) up to 115.2k baud
IR/Serial output ports;
IR - SERIAL OUT 1 – 4: (4) 2-pin 3.5 mm detachable terminal blocks; IR/Serial output ports;
IR output up to 1.2 MHz; 1-way serial TTL/RS-232 (0-5 Volts) up to 115.2k baud

**IR IN:**
(1) 3-pin 3.5 mm detachable terminal block
For connection of the CNXRMIRD IR Receiver;
Alows control from IR wireless remotes using RC-5 command set

**INPUT 1 – 4:**
(1) 5-pin 3.5 mm detachable terminal block;
Comprises (4) programmable digital inputs;
Input Voltage Range: 0 to 24 Volts DC, referenced to GND;
Logic Threshold: 2.5 Volts DC nominal with 1 Volt hysteresis band;
Input Impedance: 10k Ohms at >5 Volts, 1M Ohms at <5 Volts;
Pull-up Resistor: 2.2k Ohms per input

**RELAY 1 – 4:**
(1) 8-pin 3.5 mm detachable terminal block;
Comprises (4) normally open, isolated relays;
Rated 1 Amp, 30 Volts AC/DC;
MOV arc suppression across contacts

**COM A – B:** (2) DB9 connectors, male;
Bidirectional RS-232 ports;
Up to 115.2k baud, hardware and software handshaking support

**NET:** (4) 4-pin 3.5 mm detachable terminal blocks;
Cresnet Master ports, paralleled;
Available Cresnet Power: 10 Watts

**PoDM+ INPUT PWR:**
(1) Combo D-Sub 7w2 connector, male;
48 Volt DC power input for PoDM power supply;
Enables PoDM+ power sourcing on each DM INPUT/OUTPUT port;
Enables PoE power sourcing on the CONTROL SUBNET port

**SERVICE:**
(1) USB Type B connector, female;
For factory use only

**CONTENTS:**
100-240V – 6.0A 50/60Hz: (1) IEC 60320 C14 main power inlet;
Mates with removable power cord, included
G: (1) 6-32 screw;
Chassis ground lug

**CONTENT LAN IN 8:**
(1) 8-pin RJ45 connector, female;
10Base-T/100Base-TX Ethernet port;
Provides a dedicated LAN connection for streaming input & AirMedia

**CONTROL SUBNET:**
(1) 8-pin RJ45 connector, female;
10Base-T/100Base-TX/1000Base-T Ethernet port;
PoE PSE (Power Sourcing Equipment) port;
Provides a dedicated local network for Crestron devices

**LAN:**
(1) 8-pin RJ45 connector, female;
10Base-T/100Base-TX/1000Base-T Ethernet port

**COMPUTER (front):**
(1) USB Type B connector, female;
USB computer console port (for setup only)

**Controls & Indicators**

**PWR:** (1) Green LED, indicates operating power supplied from AC power line

**NET:** (1) Yellow LED, indicates Cresnet bus activity

**LAN:** (1) Yellow LED, indicates Ethernet activity

**HW-R:** (1) Recessed pushbutton for hardware reset, reboots the control system

**SW-R:** (1) Recessed pushbutton for software reset, restarts the software program

**LCD Display:**
(1) Green LCD alphanumeric, adjustable backlight, 2 lines x 20 characters per line, displays input/outputs by name, volume levels, setup menus, signal routing, device info, and other system information

**SOFTKEYS:** (4) Pushbuttons for activation of LCD driven functions and passcode entry

**MENU:** (1) Pushbutton, steps the menu back one level

**ENTER:** (1) Pushbutton, executes the highlighted menu or value

**VOLUME:** (1) Continuous turn rotary encoder, adjusts menu parameters, defaults to Program audio volume

**MUTE:** (1) Pushbutton and red LED, mutes the Program audio output

**INFO:** (1) Pushbutton and red LED, selects INFO mode to view AV and device info

**ROUTE:** (1) Pushbutton and red LED, selects ROUTE mode to allow routing changes

**VIEW:** (1) Pushbutton and red LED, selects VIEW mode to view current routing

**INPUT 1 – 8:**
(8) Pushbuttons and red LEDs, each selects the corresponding video input for routing

**OUTPUT 1 – 2, PROG, AUX 1 – 2:**
(5) Pushbuttons and red LEDs, each selects the corresponding video or audio output for routing

**SPEAKER OUTPUT (rear):**
(1) 3-position slide switch, selects the amplifier output configuration

**DM INPUT 7 (rear):**
(2) LEDs, green LED indicates DM link status, amber LED indicates video and HDCP signal presence
DM OUTPUT 2 (rear): (2) LEDs, green LED indicates DM link status, amber LED indicates video and HDCP signal presence.

CONTENT LAN IN 8 (rear): (2) LEDs, (1) green and (1) amber, for indication of Ethernet speed, activity, and link status.

CONTROL SUBNET (rear): (2) LEDs, (1) green and (1) amber, for indication of Ethernet speed, activity, and link status.

LAN (rear): (2) LEDs, (1) green and (1) amber, for indication of Ethernet speed, activity, and link status.

**Power**

Main Power: 6 Amps @ 100-240 Volts AC, 50/60 Hz

Power Consumption: 75 Watts typical, 60 Watts idle

Available Cresnet Power: 10 Watts

Power over DM (PoDM): IEEE 802.3at compliant PoDM+ PSE (Power Sourcing Equipment), each DM INPUT/OUTPUT port supplies up to 30 Watts to power one PoDM (Class 0-3) or PoDM+ (Class 4) PD (Powered Device) [1].

Power over HDBaseT: IEEE 802.3at PoE+ compliant PSE (Power Sourcing Equipment), each DM INPUT/OUTPUT port supplies up to 15.4 Watts to power one PoE (Class 0-3) PD (Powered Device) [2].

Power over Ethernet (PoE): IEEE 802.3at compliant PoE PSE (Power Sourcing Equipment), the CONTROL SUBNET port supplies up to 15.4 Watts to power one PoE (Class 0-3) PD (Powered Device) [3].

PoDM Power Supply: Compatible with model PW-4830DUS or DM-PSU-3X8-RPS [4].

**Environmental**

Temperature: 41° to 104° F (5° to 40° C)

Humidity: 10% to 90% RH (non-condensing)

Heat Dissipation: 256 BTU/hr typical, 205 BTU/hr idle

**Enclosure**

Chassis: Metal, black finish, fan-cooled, vented sides

Front Panel: Metal, black finish with polycarbonate label overlay

Mounting: Freestanding or 3 RU 19-inch rack-mountable (adhesive feet and rack ears included)

**Dimensions**

Height: 5.20 in (133 mm) without feet

Width: 17.28 in (439 mm);

19.00 in (483 mm) with rack ears

Depth: 15.75 in (400 mm)

**Weight**

15.5 lb (7.1 kg)

**Compliance**

UL Listed for US & Canada, IC, CE, FCC Part 15 Class A digital device

---

**Maximum DM 8G+ Cable Lengths**

**MODELS & ACCESSORIES**

**Available Models**

DMPS3-4K-250-C: 3-Series® 4K DigitalMedia™ Presentation System 250

**Available Accessories**

SW-DMPS3-AIRMEDIA: AirMedia® License

TSW-760 Series: 7” Touch Screen

TSW-760-NC Series: 7” Touch Screen without Camera, Microphone, or PinPoint™ Beacon

TSW-1060 Series: 10” Touch Screen

TSW-1060-NC Series: 10” Touch Screen without Camera, Microphone, or PinPoint™ Beacon

MP-B10 Series: Media Presentation Button Panel B10

TT-100, TT-101, TT-110, & TT-111 Series: Crestron Connect It™ Cable Caddies

PW-4830DUS: 150W PoDM Power Pack

DM-PSU-3X8-RPS: PoDM+ Redundant Power Supply

DM-TXR-100-STR: HD Streaming Transmitter/Receiver

DM-RMC-4K-100-C-1G Series: Wall Plate 4K DigitalMedia 8G+® Receiver & Room Controller 100

DM-RMC-4K-100-C: 4K DigitalMedia 8G+® Receiver & Room Controller 100

DM-RMC-4K-SCALER-C: 4K DigitalMedia 8G+® Receiver & Room Controller w/Scaler

DM-RMC-4K-SCALER-C-DSP: 4K DigitalMedia 8G+® Receiver & Room Controller w/Scaler & Downmixing

DM-RMC-200-C: DigitalMedia 8G+® Receiver & Room Controller 200

DM-RMC-SCALER-C: DigitalMedia 8G+® Receiver & Room Controller w/Scaler

DM-TX-4K-100-C-1G Series: Wall Plate 4K DigitalMedia 8G+® Transmitter 100

DM-TX-200-C-2G: Wall Plate DigitalMedia 8G+® Transmitter 200

DM-TX-4K-202-C: 4K DigitalMedia 8G+® Transmitter 202

DM-TX-4K-302-C: 4K DigitalMedia 8G+® Transmitter 302

DM-TX-201-C: DigitalMedia 8G+® Transmitter 201

DM-TX-401-C: DigitalMedia 8G+® Transmitter 401
USB-EXT-D3M-LOCAL: USB over Ethernet Extender with Routing, Host Module
USB-EXT-D3M-REMOTE: USB over Ethernet Extender with Routing, 4-Port Device Module
AMP-150 Series: Single-Channel Modular Power Amplifiers, 50W, 70V or 100V
AMP-225: Dual-Channel Modular Power Amplifier, 25W/Ch., 4/8 Ohm
AMP-1200 Series: Single-Channel Modular Power Amplifiers, 200W, 70V or 100V
AMP-2100 Series: Dual-Channel Modular Power Amplifiers, 100W/Ch.; 4/8 Ohm, 70V, or 100V
AMP-2210HT: 2x210W Commercial Power Amplifier, 4/8Ω or High-Power 70V
AMP-2210S: 2x210W Commercial Power Amplifier, 4/8Ω
AMP-2210T: 2x210W Commercial Power Amplifier, 4/8Ω or 70/100V
AMP-3210S: 3x210W Commercial Power Amplifier, 4/8Ω
AMP-3210T: 3x210W Commercial Power Amplifier, 4/8Ω or 70/100V
GLS-DOT-C-CN: Dual-Technology Occupancy Sensor with Cresnet®
GLS-OIR-C-CN: Passive Infrared Occupancy Sensor with Cresnet®
SW-FUSION-C-3: Crestron Fusion® Cloud
SW-FUSION-P-L: Crestron Fusion® On-premises
CRESTRON-APP Series: Crestron® App for Mobile Devices
XPANEL: XPanel – Crestron Control® for Computers
SW-3SERIES-BACNET-SBACNET-S: BACnet™/IP Support for 3-Series
CSP-LIR-USB: IR Learner
CNSP-XX: Custom Serial Interface Cable
IRP2: IR Emitter
CNXRMDIR: IR Receiver
DM-CBL-ULTRA-RECP: DigitalMedia™ Ultra Keystone RJ45 Jack
DM-CBL-ULTRA-PC: DigitalMedia™ Ultra Patch Cables
DM-CBL-ULTRA SERIES: DigitalMedia Ultra Cable
DM-CONN-20: Connectors for DM-CBL-ULTRA Series
DM-CBL-8G Series: DigitalMedia 8G™ Cable
DM-8G-CONN-100: Connectors for DM-CBL-8G Series
DM-8G-GRIMP: Crimping Tool for DM-8G-CONN-100
DM-8G-CONN-WG-100: Connectors with Wire Guide for DM-CBL-8G Series
DM-8G-GRIMP-WG: Crimping Tool for DM-8G-CONN-WG-100
CRENSET Series: Cresnet® Control Cable
CBL Series: Crestron® Certified Interface Cables
MP-WP Series: Media Presentation Wall Plates
MPI-WP Series: Media Presentation Wall Plates – International Version

Notes:
1. To enable the onboard AirMedia gateway requires the purchase of one SW-DMPS3-AIRMEDIA license. To obtain the license or for any questions regarding AirMedia activation, please visit https://www.crestron.com/dmps-airmedia-activation. Wireless presentation using AirMedia requires an external wireless access point (not included). A wired Ethernet connection may also be used. AirMedia network traffic can be routed through the primary LAN port or isolated through the CONTENT LAN port. Performance quality for full-motion video content is dependent upon network performance and sending device performance. AirMedia support in the DMPS3-4K-250-C includes the same essential functionality as the AM-101 AirMedia Presentation Gateway with the exclusion of quad view, moderator mode, and remote view.
2. Some features and functions described in this spec sheet may not be supported using AV Framework. For a complete list of capabilities and options supported by AV Framework, please visit: www.crestron.com/avframework.
3. The streaming and AirMedia inputs are mutually exclusive. Only one or the other can be used at one time. Streaming network traffic can be routed through the primary LAN port or isolated through the CONTENT LAN port.
4. HDMI connections require an appropriate adapter or interface cable to accommodate a DVI or Dual-Mode DisplayPort signal. CBL-HD-DVI interface cables are available separately.
5. The HDMI output does not pass 3D signals. On this output, 3D signals are automatically converted to 2D, then scaled and output as 2D. 3D signals can be passed through the DM 8G+ output.
6. Item(s) sold separately.
7. The maximum cable length for DigitalMedia 8G+ (DM 8G+) or HDBaseT is dependent upon the type of cable and resolution of the video signal. Refer to the “Maximum DM 8G+ Cable Lengths” table for a detailed overview. Crestron legacy cable models DM-8G-DM 8G+ Cable and DM-CBL-8G DigitalMedia 8G+ Cable support the same resolutions and cable lengths as CAT5e. Shielded cable and connectors are recommended to safeguard against unpredictable environmental electrical noise which may impact performance at resolutions above 1080p. Refer to the Crestron DigitalMedia Design Guide, Doc. #4546 for complete system design guidelines. DM 8G+ is compatible with HDBaseT Alliance specifications for connecting to HDBaseT compliant equipment. All wire and cables are sold separately.
8. Enabling PoDM and PoE power sourcing requires an external power supply, model PW-4530US or DM-PSU-3X9-2PS, sold separately. Due to the inherent power loss that occurs over CATx cable, a maximum of 25.5 Watts is delivered at each PoDM+ or HDBaseT PoE+ powered device. Be aware that the CONTROL SUBNET port is limited to PoE (Class 0-3), which delivers a maximum of 12.95 Watts to the powered device. Any wiring that is connected to a PoDM or PoE PSE port is for intra-building use only and should not be connected to a line that runs outside of the building in which the PSE is located.
9. Manages the routing of USB HID signals between peripheral DM devices that are equipped with USB HID ports. The USB ports onboard the DMPS3-4K-250-C are not usable for USB signal routing. Also programmable to manage the routing of USB signals between Crestron USB over Ethernet Extender modules (USB-EXT-D3M, sold separately). Refer to the USB-EXT-D3M spec sheet for more information.
10. License required. The DMPS3-4K-250-C supports a maximum of 500 BACnet objects when dedicated for BACnet use only. Actual capabilities are contingent upon the overall program size and complexity.

This product may be purchased from an authorized Crestron dealer. To find a dealer, please contact the Crestron sales representative for your area. A list of sales representatives is available online at www.crestron.com/salesreps or by calling 800-237-2041.

The specific patents that cover Crestron products are listed online at: patents.crestron.com.

Certain Crestron products contain open source software. For specific information, please visit www.crestron.com/opensource.
